

New Graduate Chiropractor position with Wollongong Osteopathic Clinic.

We are looking to recruit a new graduate chiropractor who is willing to learn and practice the basics of the genuine osteopathic approach to physical therapy. We have had a great experience with a new grad chiropractor previously and are eager to repeat the experience.

Ours is the primary Osteopathic clinic in the Sutherland Shire and Wollongong catchment, based in the Wollongong CBD. We have a strong growing patient base that caters to people of all walks of life and needs, from newborns to hip replacements to the Illawarra Steelers.

Your diagnostic, soft tissue and manipulative skills will need to be great, and you must be willing to learn a different paradigm to what you may now know. We expect a structural approach to patient care. Remuneration is great, you will work in a professional, supportive and happy environment, and most importantly, you will enjoy your work enormously. Check out our website www.wollongongosteopaths.com.au.
